2.30.060 Powers.

A. The Building Board of Appeals is authorized to grant variances and to hear appeals from decisions issued by:

2. The Fire Official in connection with administration or enforcement of Chapter 9.52 (Fire Protection Code).

B. The Building Board of Appeals is authorized to impose reasonable conditions or safeguards as necessary to ensure that the purpose and intent of this code are satisfied. The granting of a variance pursuant to this section shall not be construed as a waiver of any other requirement of the code. The power of the Board to modify the code regulations shall not be interpreted to allow the Board to modify any fees required to be paid in accordance with the code.

C. The Building Board of Appeals may:

1. Make recommendations to the Building Official with respect to changes in the code.
2. Make recommendations to the Building Official regarding the appropriateness of materials, methods, or equipment for use in the city.
3. Recommend standards for safety, protection of life and property, and workmanship for residential and commercial construction in the City.

2.30.070 Appeals and variances.

A. The owner of a property, building, structure or service system, or duly authorized agent of such, may appeal a decision of any of the following City officials - the Building Official and the Fire Official - as established under Section 2.30.060 above, whenever any one of the following circumstances exists:

1. When the City official rejects or refuses to approve the design or method of construction proposed to be used in the construction or alteration of a building, structure or service system; or
2. When the City official rejects the material proposed to be used in the construction or alteration of a building, structure or service system; or
3. When the City official refuses to extend a permit; or

B. In considering an appeal of a decision of a City official, the Building Board of Appeals shall have the same authority to decide the issue as the official making the decision being appealed.

1. An application for appeal shall be signed by owner of the subject property.
2. Applications shall be accompanied by sufficient documentation confirming the validity of the proposed construction of a permanent facility including the time period for start and completion of construction.
3. Application shall be accompanied by a plot plan drawn to scale indicating the location of proposed temporary structures, property lines, setbacks and off-street parking.
4. Application shall be accompanied by drawings or other documentation describing the construction of the proposed temporary facility.

D. The Building Board of Appeals, upon appeal by the owner of a property, building, structure or service system, or duly authorized agent of such, and after a hearing, may vary the application of any provision of the code to any particular case when, in its opinion, the enforcement thereof would do manifest injustice and would be contrary to the spirit and purpose of the code or public interest.

E. In considering a request for variance of the code requirements, the Building Board of Appeals shall consider the following where appropriate:

1. That sufficient technical, architectural, engineering or fire prevention cause(s) exists to warrant the granting of a variance.
2. That special conditions and circumstances exist which are unique to the site, building, structure or service system and are not applicable to others.
3. That the special conditions and circumstances do not result from the action or inaction of the applicant.
4. That granting the variance requested does not confer on the applicant any special privilege that has been previously denied by the Board to other similarly situated sites, buildings structures or service systems.
5. That the variance requested is the minimum variance that will make possible the reasonable use of the site, building, structure or service system.
6. That granting the variance will be in harmony with the general intent and purpose of the code and will not be detrimental to the public health, safety and welfare.

F. In granting a variance, the Building Board of Appeals may prescribe a reasonable time limit within which the action for which the variance is required shall be commenced or completed or both. In addition, the Building Board of Appeals may prescribe reasonable conditions and safeguards in conformity with the intent of the code.
